

Free Publications Available from the National Institutes of Health Students Learn the Science of Drug Abuse

Classes are officially in session, but parents and teachers can still supplement student studies. Now students can learn about the science of drug abuse, and teachers can receive help with lesson planning, by ordering **FREE** publications from the National Institute on Drug Abuse (NIDA).

NIDA, part of the National Institutes of Health, has created a health education campaign to keep students, parents, and educators in the loop all year long. Now in its fifth year, the *NIDA Goes Back to School* campaign is the source for **FREE** publications that teach students of all ages about the consequences of drug abuse.

Students can journey through the brain and body to learn about the effects of drug abuse. Parents can get tips on talking to their children about the dangers of drugs. And teachers can enhance classroom activities with colorful handouts, informative magazines, and student and teacher editions of new publications.

And there's more. NIDA recently adapted its materials to meet the needs of Spanish-speaking populations. The Institute offers a variety of **FREE** Spanish-language materials for students, parents, and teachers.

Order these **FREE** publications for individual use, or place a bulk order to add a measure of science to your classroom activities or special events.

To order:

- Visit www.backtoschool.drugabuse.gov.
- Call 1-800-729-6686, 1-877-767-8432 (Español), or 1-800-487-4889 (TDD).
- Send bulk publication requests to information@nida.nih.gov.
